

## **FOLIO - SOCIAL MEDIA FOR CREATIVES**

### **FEATURES**

#### **Register**

A user must register in order to have the ability to make posts and comments, and like posts. In this procedure, the user will provide their first name, last name, username, password, email address, birthday. Upon registration, they would be redirected to the profile management section where they can set up their profile.

Users have to confirm account registration through a link sent to their registered email.

#### **Close account**

A registered user may delete their account should they need to. The user will be asked to input their password as confirmation of the deletion.

#### **Log in**

A registered user may log in. Username or email can be used.

#### **Log out**

A registered user may log out from the website.

#### **Profile management**

Upon registration, the user will be asked to indicate a display name, a display photo, occupation (optional), country and city of residence (optional), mobile number (optional), and a short description about the user. The profile can be edited by the user again after registration by accessing it via account panel.

#### **Account management**

This is where a registered user can change their email and password, and access the account deletion page.

#### **View feed**

Upon logging in, the user will be shown with the latest posts in chronological order.

Only posts of followed users will be shown.

#### **View profile**

A registered user may view other people's profiles and their own profile. In the profile page, the display name, display photo, country and city of residence (city is optional), description, and previews of their posts are displayed. Previews are displayed in chronological order. If the user opens the profile of another user, the user will have an option to follow or unfollow that user.

#### **View post**

A registered user may open individual posts. After which, the user can navigate through the author's previous posts by pressing the left and right buttons.

#### **Create post**

A registered user may create a post. It can contain either a photo or text, or both. Text posts can be a blog post or simply just a 180-character post. A blog post has a title as well as the content of the post. It can also have an optional header photo.

#### **Edit post**

A registered user may edit a post by changing the text and/or photo.

#### **Delete post**

A registered user may delete a post at their discretion. The function will be tucked in a “more actions” button

### **Share post**

A registered user may share a post that he or another user has made, given that the user’s account setting is set to public.

### **Archive post (OPTIONAL)**

A registered user may archive a post that they have created. It will be added to a list of posts that they have archived. Users also have the ability to unarchive a post

### **Add comment**

Registered users may comment on another user’s post.

### **Follow user**

Registered users may follow other users. Posts of followed users will appear on their feed.

### **Unfollow user**

Registered users may unfollow previously followed users. Posts of unfollowed users will no longer appear on their feed.

### **Delete comment**

Registered users may delete comments that they have left on a post.

### **Search users**

Registered or unregistered users may search for a registered user’s profile.

### **Search posts**

Registered users may search for posts.

### **Users near me (OPTIONAL)**

Similar to the home feed, but instead posts from the users in the country or city of residence of the user will be displayed.

### **General**

Good user experience. Visitors can easily navigate without help, all information is easy to access. Good visual design. Design suits the theme of the application, and is cohesive and consistent across the whole application
